### POINTS OF CONSIDERATION

- Established by drummer for universally adored Hair Police.
- Sure to please fans of Zappa, Steely Dan and sex on a pontoon boat navigating a municipal lake late in the season.
- Limited to an edition of 300 luxurious replications internationally.

### CRITICAL ACCLAIM

"Heavy rotation on my player, a new fave... Delighted with all the ideas, melodies and adventurous chords..." -

**R. Stevie Moore, Godfather of DIY**  
"Attempt is like listening into the future of underground music: 10cc plus Steely Dan playing jazz fusion on a peyote trip." - **Robert Schneider, The Apples in Stereo**

"Upon first glance, Attempt's Personal Fables may seem like a lost yacht rock masterpiece from 1978--a cross between breezy SoCal harmonic pop and supple studio trickery. Listen closer, and this is a satin-draped uncanny valley, a clever evocation of all the plush pleasures of '70s soft-rock but it's just as likely to disturb as delight." - **Stephen Thomas Erlewine, Senior Editor at Allmusic.com**

*From the ashes of a tumultuous 2016 arises the spectral image of hope and positivity from Lexington, Kentucky: Desperate Spirits.*

*For its inaugural release and your pleasure, we proudly present the challenging offerings of ATTEMPT, a humble and ongoing concern exploring the vocabulary of such master musicians as Zappa or Becker & Fagen mixed with the accessibility of Rundgren. ATTEMPT strives to win your heart, not break it. It demands your neural networks fire on all cylinders, but have a good time doing so.*

*The singular vision of iconoclastic sound architect Trevor Tremain, the album is a reflection of the provocative and exploratory spirit emblematic of the band's live performances. A tour of the continuous United States is imminent, with exclusive engagements in high profile urban areas for top-tier market penetration. Target demographics include closet alcoholics, the newly unemployed, and libertines.*

*This is music escaping easy and convenient categorization. It is twisted blue-eyed soul for the hyperaware manic within all of us. It is music that finds the beauty in the marriage between dissonance and resolve; all the while giving you permission to shake a tail feather.*
